

Management of All Other EM Work (i.e., Non-Capital Asset Projects)

- In the next several months, we will be establishing Project Lists for all EM work not covered under the Order. **The CAPs and other types of projects are expected to roll up to the PBSs.** Project types other than CAPs may include:
 - Operational projects
 - Contractor-owned facility projects
 - Technology development projects
 - Long-term stewardship
 - Other PBS projects
- The specific management requirements will be a subset of the Order and will be tailored to the activities covered under each project type.
